Evaluation

Primary reason for attending the conference

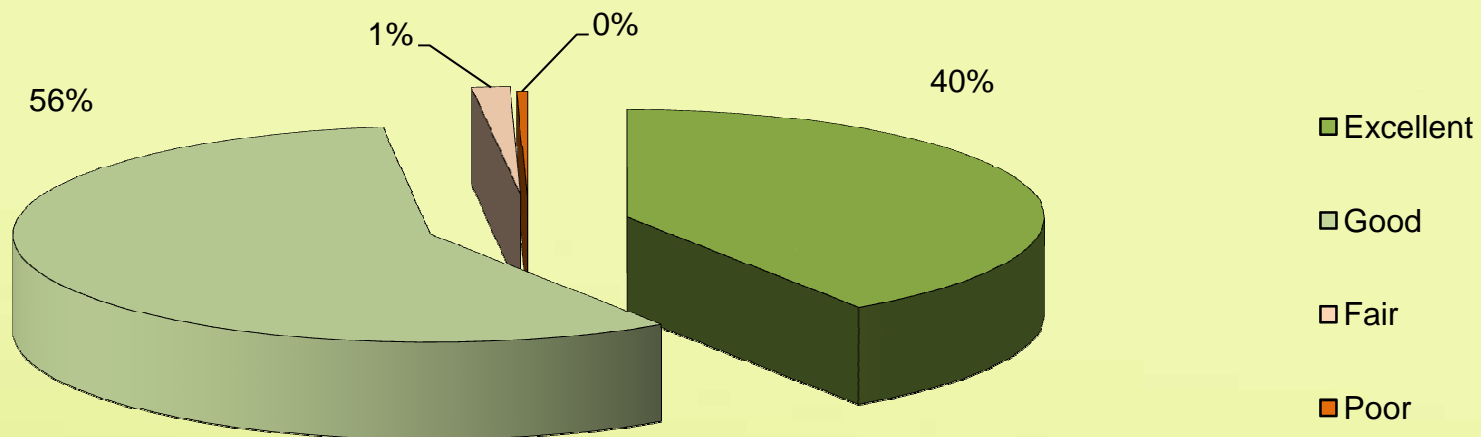

- First time introduction to main topic
- Update overall knowledge about vascular surgery
- Learn more about one particular technique
- Obtain CME credits
- Other

*72% of questioned physicians said they were here to **update overall knowledge about vascular surgery***

Primary reason for attending the congress: learn more about one particular technique. Which one ?

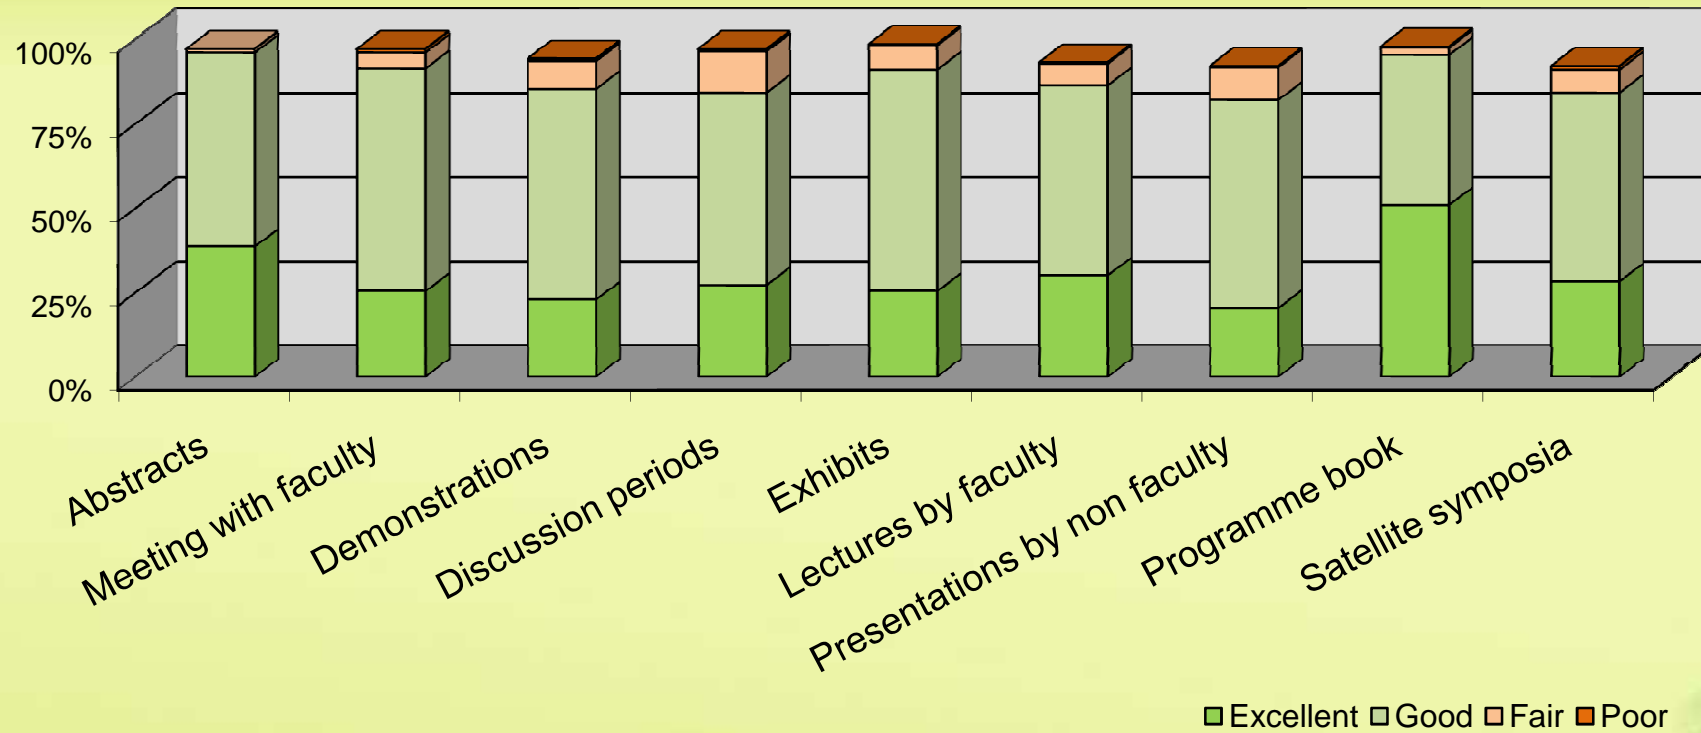

- EVAR x5
- Laparoscopic surgery (x 3)
- TEVAR x2
- Fenestrated grafts (x2)
- VAS (x2)
- Stent grafts in aortic treatment
- Foam sclerotherapy
- Compression
- Endovascular
- Radio frequency
- Vascular accesses
- BTK
- PTA
- AAA
- Angioplastie

How well did the Congress programme do in fulfilling this goal ?

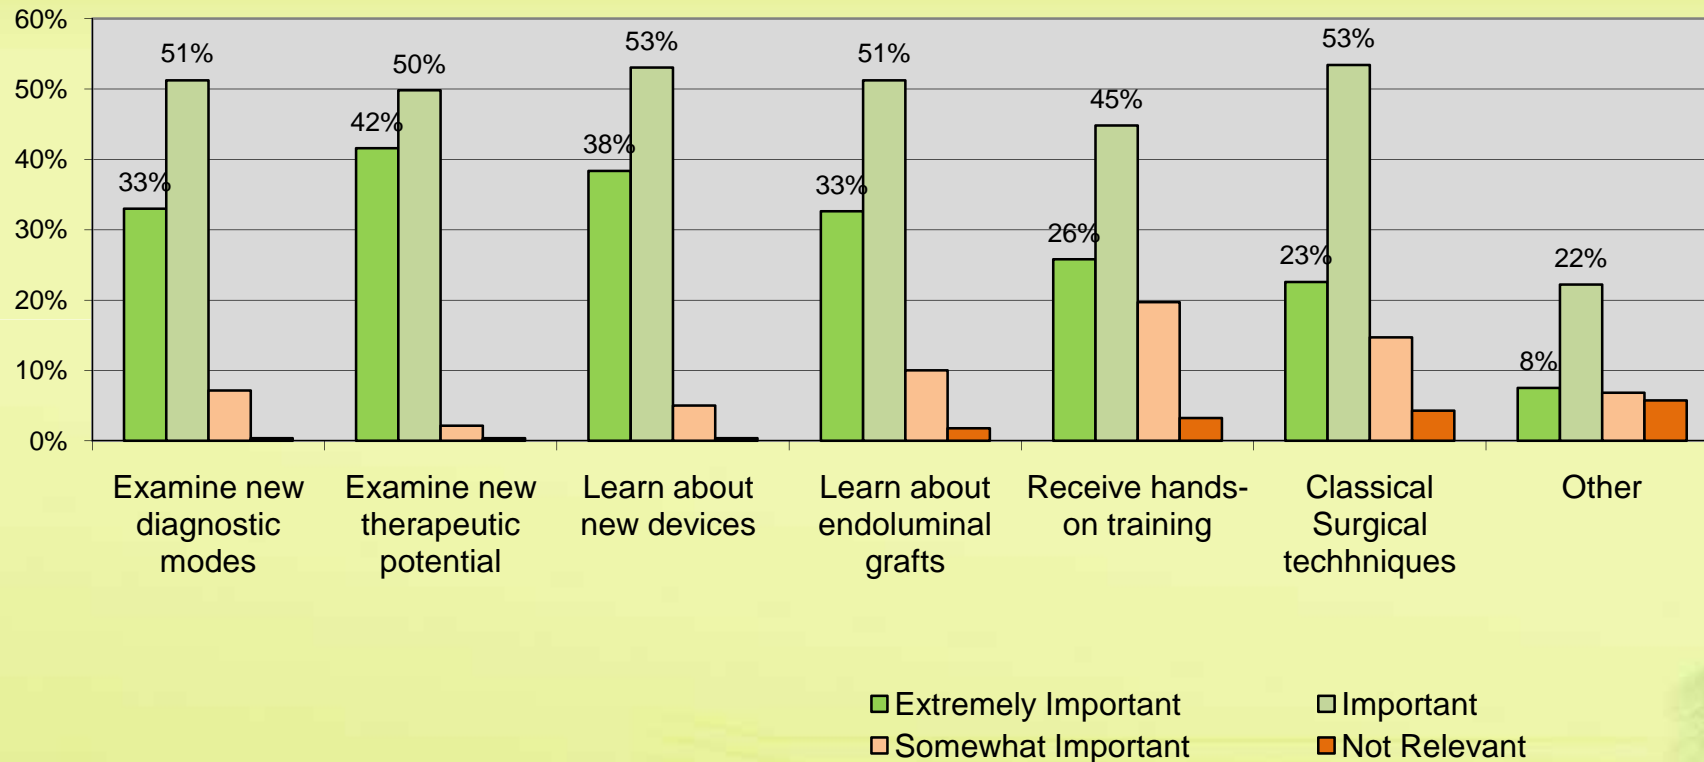

We can say that 96% of the delegates were satisfied by the Congress

Evaluation and rate of the elements of the meeting in fulfilling your goal

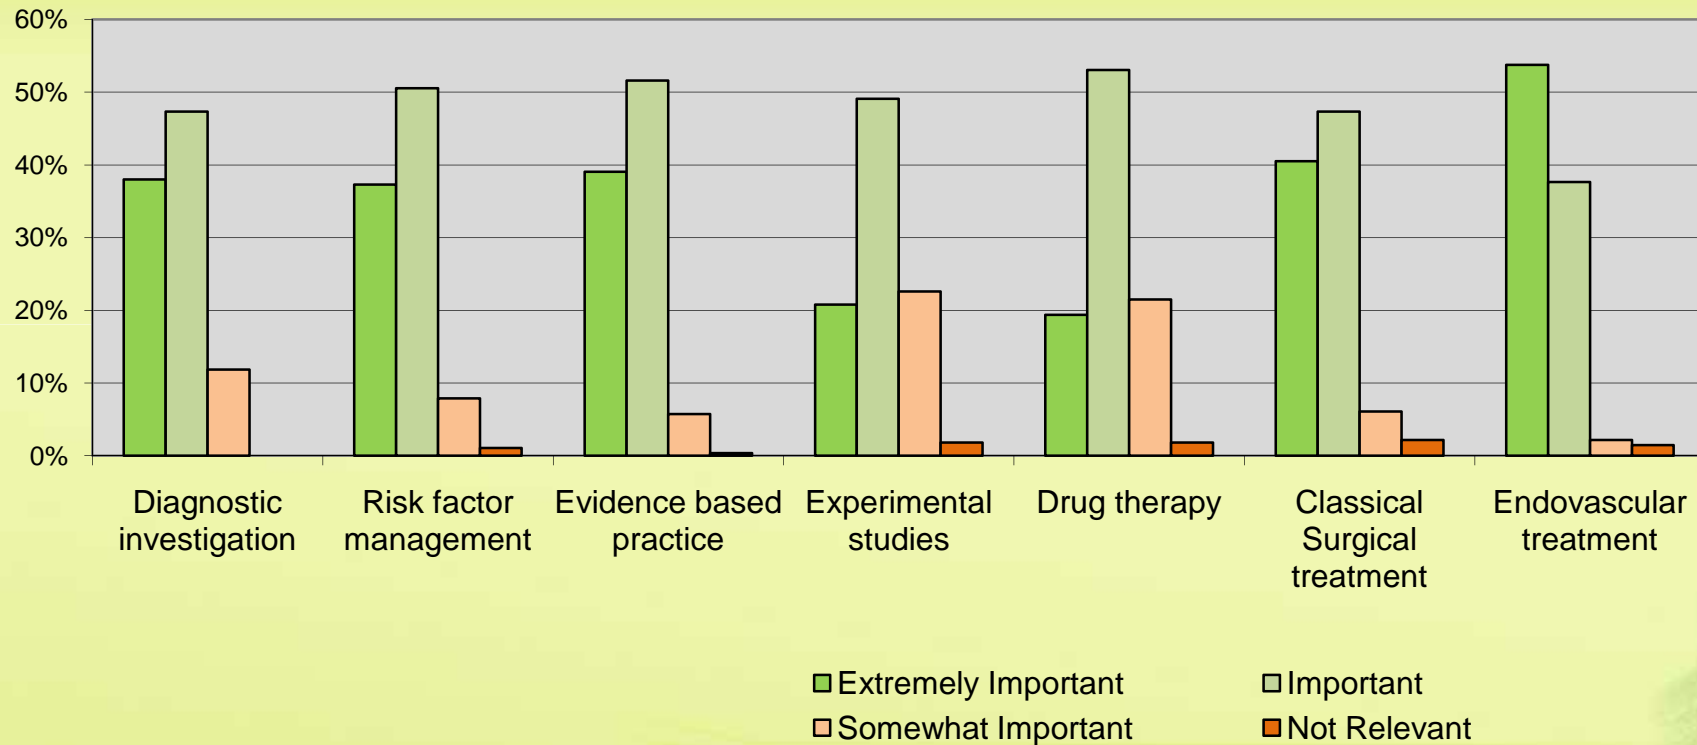

96% were satisfied with the abstracts and 51% of the participants found the program book excellent; attendees were less satisfied concerning discussion periods, but this is still better than during the 2010 edition.

Rating of the educational needs

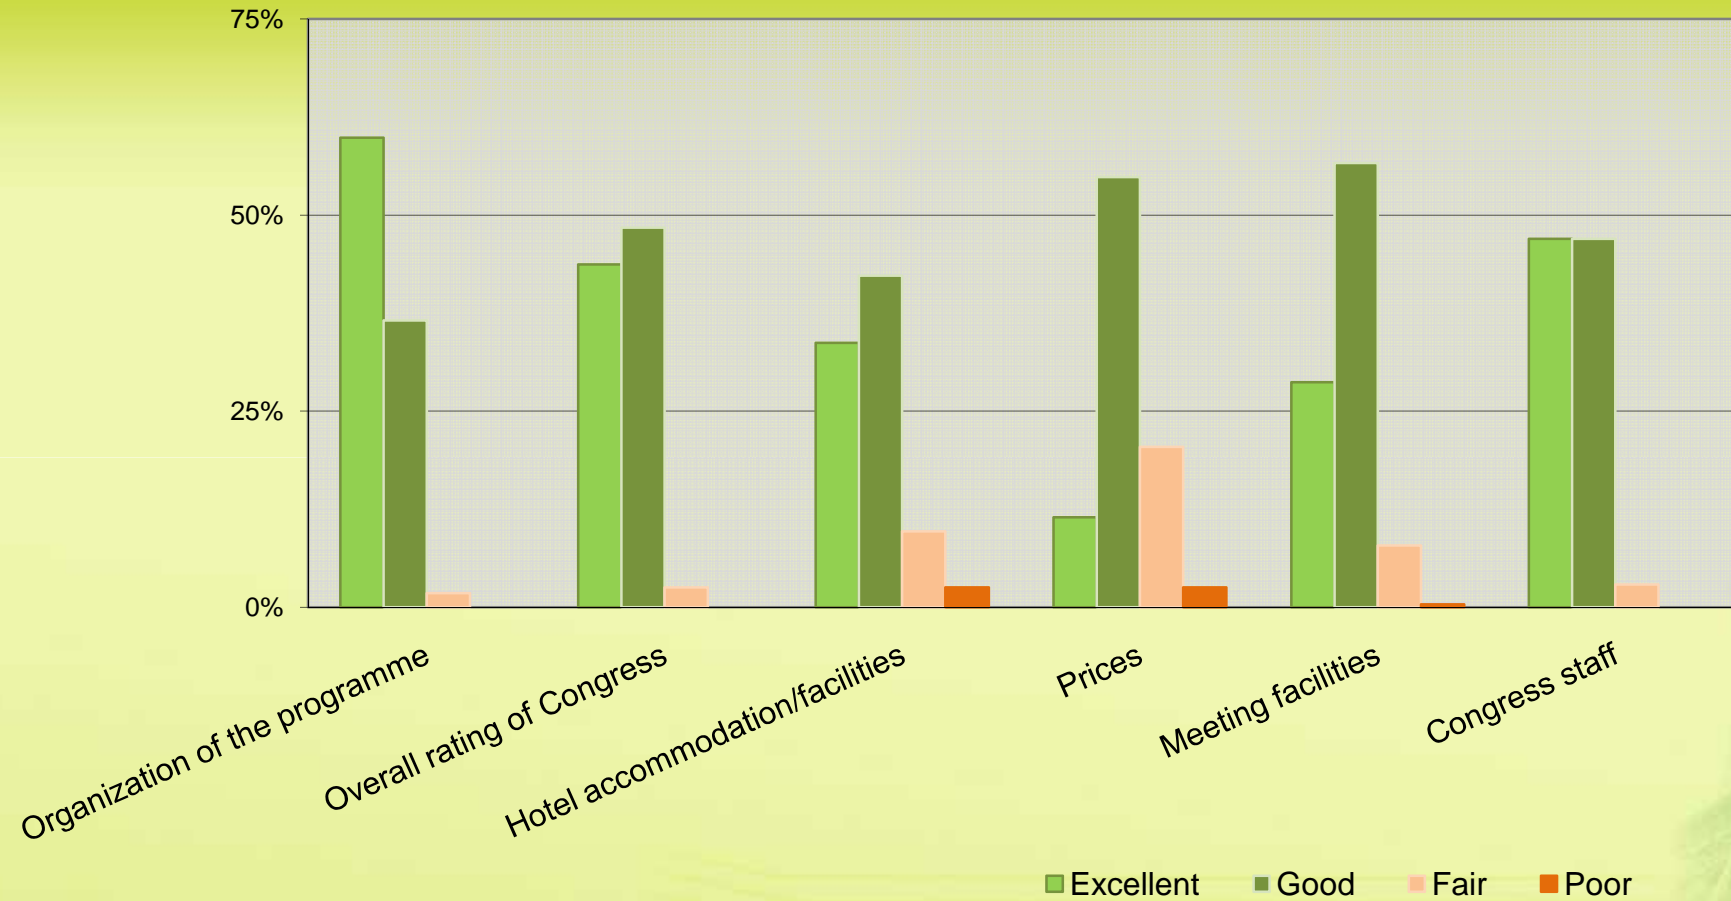

Participants need over all to learn about new devices. However, the other needs are important except for receive hands-on training, classical and surgical techniques.

Importance of the topics in physicians' practice

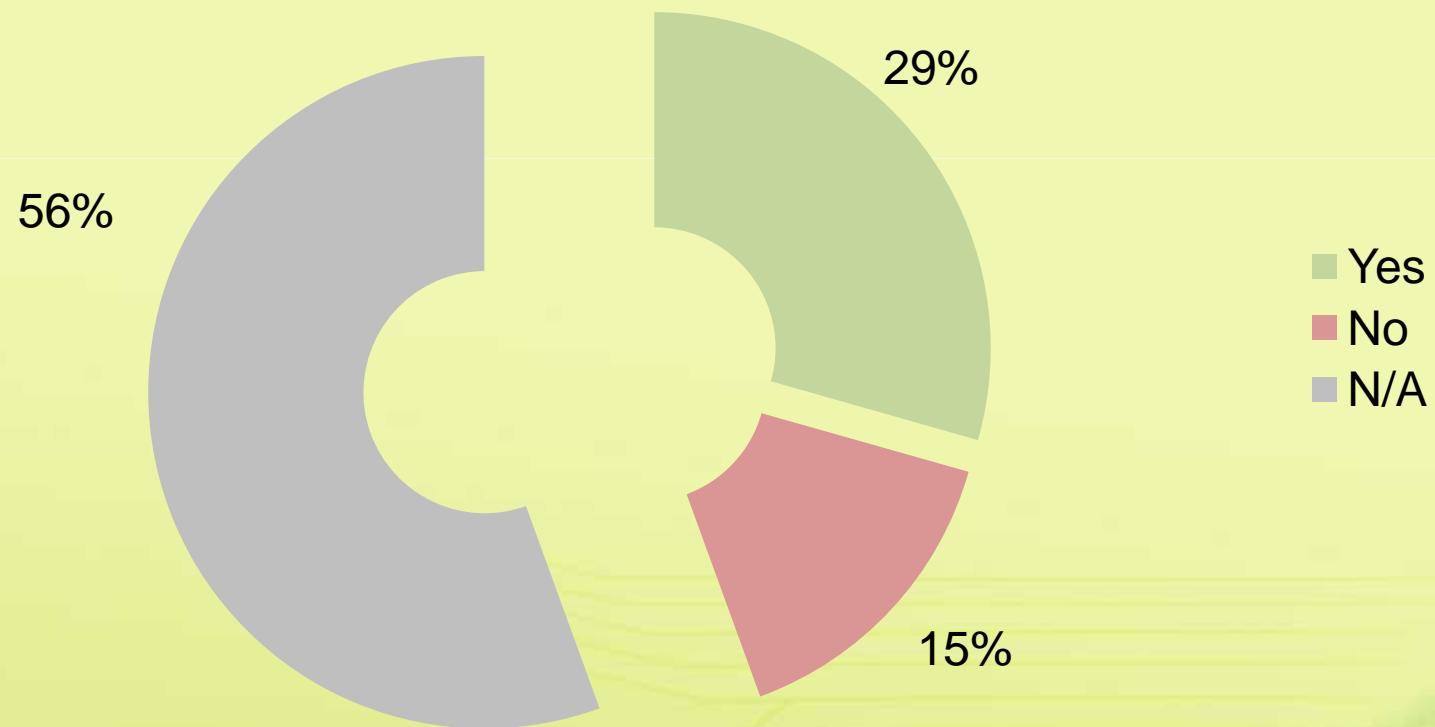

The endovascular treatment is the most important topic (more than 50% of attendees answered it is extremely important). All topics seemed important except for experimental studies.

General rating

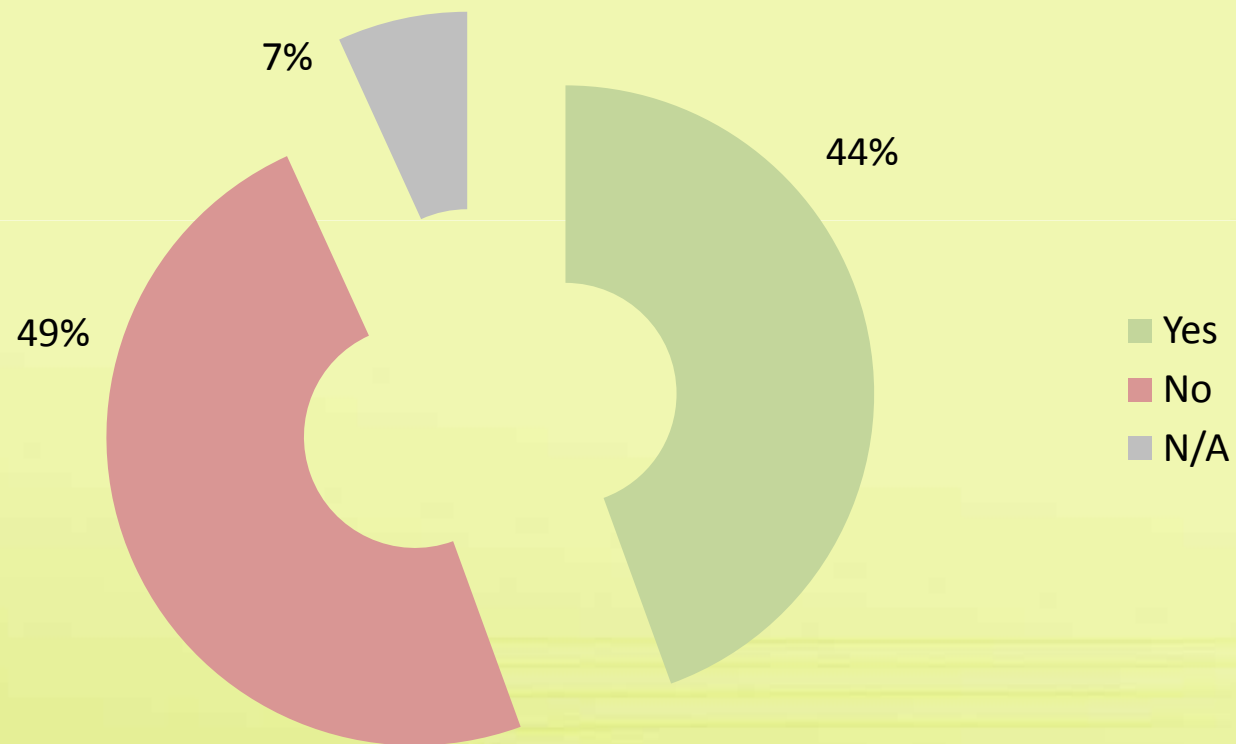

Results show that this congress was a success. We can underline that hotel accommodation and prices have been rated poorly.

Are you interested in the venous session?

Do you want to suppress the book? (hard copy)

Comments

Summary of the information received which will be helpful

- CAS x3
- Epidemiology of AAA
- Vein pathology therapy
- Lower limb ischemia
- Venous sessions
- News deal (dilat stenting)
- New techniques in endovascular surgery / techniques x7
- Endovascular treatment of type B dissection
- All the congress is useful in my every day practice x4
- Technical practice
- Consideration about hypogastric artery during EVAR
- EVAR x5
- New anticoagulants x2
- Traitement des perforantes plus complexe
- Update of devices
- Fenestrated endoprosthesis applied in clinical cases
- Update in phlebology
- Endoluminal treatment update
- Management in aortic dissection
- Artéropathie distale
- Indications de l'angioplastie
- Traitement des ischémies des membres
- Classical surgical treatment
- Trial results
- Carotid stenting versus surgery x2
- Deep vein reconstruction

Further Comments

- Very interesting / good congress / meeting x6
- Best meeting in Europe !
- Congratulations
- Amélioration à prévoir pour les casques audio
- Amélioration à prévoir pour l'organisation des lunch : pas de places assises, pas beaucoup de place et temps trop bref / Prévoir des mange debout
- Créer une session paramédicale / pour personnel de salle op

- Please keep the book for ever !
- In the book, lack of diagrams and tables showed during presentations
- Les résumés et conclusions du livre pourraient être traduits en français

- Translation system poor x3
- Très mauvais hôtel (pas plus de précision)
